UNCERTAINTY AESTHETIC MANIFESTATIONS IN-DEPTH SYMPOSIUM

THURSDAY, 6 MARCH 2025, 9:15 – 18:30

How does art capture and shape our encounters with the unknown? Building on our broader exploration of uncertainty's existential and epistemic dimensions within the Uncertainty Symposia series, we devote a special day to the aesthetic dimensions of uncertainty—examining how artistic practices foreground and negotiate uncertainty as an essential element of human experience. We will consider how art across literature, visual media, and music both reflects and shapes our emotional and cognitive responses to life's inherent unpredictability.

Drawing on historical-theoretical and cognitive-scientific approaches, we ask: Does aesthetic experience reduce uncertainty, or does it deepen our engagement with the unknown? Does art impose order through form-making, or does it expose the limits of representation? Is uncertainty an inherent condition of aesthetic experience, and how do the two interrelate in terms of underlying structures or cognitive processes? Through rigorous analysis, our work seeks to elucidate the relationship between art and uncertainty, advancing our understanding of how creative practices inform and transform our engagement with indeterminacy.
